

2. *MRH* forum member **Ken Rice** started a thread about how the prototype marks track clearance points. He posted this photo and is encouraging others to post more photos to show different methods used by real railroads for this.

## Clearance point markers

*MRH* forum member **Ken Rice** started a thread to collect examples of how prototype railroads mark the clearance point on spur tracks, yard tracks, and sidings.

“One of the interesting and useful details on the prototype is how clearance points are marked. Sometimes not at all, sometimes, subtly, and sometimes blatantly obvious. If you’ve got photos of prototype clearance point markers, please post them here. The Grafton & Upton’s Hopedale yard clearance markings [2] fall into the blatantly obvious category.”

Follow this thread for more.
